

ALAN THOMAS

8281132762 | alanthomask77@gmail.com | linkedin.com/in/alan-thomas-b30885276 | github.com/Alanatk

PROFESSIONAL SUMMARY

Motivated MCA student with hands-on experience in Python, deep learning, machine learning, and full-stack web development. Built and deployed real-world AI projects including a CNN-based digit recognition app with Streamlit and a Bitcoin price predictor using LSTM and sentiment analysis. Skilled in TensorFlow, Keras, React, and SQL. Strong problem-solving, teamwork, and communication skills. Seeking an entry-level role in Software Development, Data Science, or AI/ML.

TECHNICAL SKILLS

- **Programming Languages:** Python, Java, C++, JavaScript, SQL
- **AI / ML Frameworks:** TensorFlow, Keras, Scikit-learn, CNN, LSTM, Random Forest, Deep Learning, Machine Learning
- **Data Science:** NumPy, Pandas, Matplotlib, Feature Engineering
- **Web Development:** React, Node.js, HTML, CSS, Tailwind CSS
- **Tools & Platforms:** Streamlit, Jupyter Notebook, Git, GitHub
- **Cloud:** Oracle Cloud Infrastructure (OCI), Cloud Computing
- **Other:** ServiceNow, AI Tools, Prompt Engineering
- **Soft Skills:** Agile, Problem Solving, Teamwork, Communication, Adaptability

PROJECTS

Bitcoin Price Prediction Using Machine Learning | *Python, LSTM, Random Forest, Sentiment Analysis* | github.com/Alanatk/Bitcoin-price-predictor

- Built a hybrid ML model combining LSTM (deep learning) and Random Forest to forecast Bitcoin price trends using historical market data
- Integrated Twitter sentiment analysis to capture market sentiment as an additional feature for price prediction
- Performed end-to-end data preprocessing using Pandas and NumPy — handled missing values, normalized price data, and engineered time-series features
- Evaluated model accuracy using RMSE and MAE metrics; visualized actual vs predicted price trends using Matplotlib
- Live demo deployed and accessible via portfolio: alanatk.github.io/Portfolio

Handwritten Digit Recognition Using CNN | *Python, TensorFlow, Keras, CNN, Streamlit* | github.com/Alanatk/MNIST_digit_recognition

- Designed and trained a Convolutional Neural Network (CNN) on the MNIST dataset (60,000 training images) to classify handwritten digits 0–9
- Built multi-layer CNN architecture with Conv2D, MaxPooling, Dropout, and Dense layers using TensorFlow and Keras for high classification accuracy
- Preprocessed image data — normalized pixel values, reshaped input tensors, and applied one-hot encoding for output labels
- Deployed the trained model as an interactive real-time web application using Streamlit, allowing users to draw and recognize digits live
- Saved trained model as `mnist_model.h5` for reuse; live demo available at mnistdigitrecognition.streamlit.app

Personal Portfolio Website | *HTML, CSS, Tailwind CSS, JavaScript, React* | alanatk.github.io/Portfolio

- Designed and developed a responsive personal portfolio website showcasing projects, certifications, skills, and education
- Built with modern web technologies including React, Tailwind CSS, and JavaScript for a clean, mobile-friendly user interface
- Integrated project demos, certificate PDF links, GitHub repository links, and a live contact section
- Deployed and hosted using GitHub Pages for continuous availability and version-controlled updates

- Demonstrates full-stack web development skills and ability to build production-ready, publicly accessible applications

EDUCATION

Master of Computer Applications (MCA) — University of Calicut	Aug 2025 – Present
Bachelor of Computer Applications (BCA) — Bharathiar University	Aug 2022 – Mar 2025
Diploma in Cloud Computing — JB International Skill Park	2023 – 2024
Diploma in Cyber Security — JB International Skill Park	2024 – 2025

CERTIFICATIONS

- Getting Started with Artificial Intelligence — IBM SkillsBuild (Mar 2025)
- Oracle Cloud Infrastructure 2023 Certified Foundations Associate — Oracle (Mar 2024)
- Micro-Certification: Welcome to ServiceNow — ServiceNow (Jan 2025)
- One Million Prompters Initiative — Certificate of Completion
- Naan Mudhalvan Robotic Process Automation (RPA) Foundation Course (Sep 2024)

CORE COMPETENCIES

Machine Learning • Deep Learning • CNN • LSTM • Random Forest • TensorFlow • Keras • Python • SQL • JavaScript • React • Node.js • NumPy • Pandas • Matplotlib • Sentiment Analysis • Data Visualization • Streamlit • Tailwind CSS • Oracle Cloud (OCI) • Agile • Problem Solving • GitHub
